## PROJECTS/

## EXPERIENCE:

**openchat**, Personal Project

May 2020 - Present

- Reflected on the shortcomings of the previous project and utilized them to draft new requirements for a cross-platform social media app.
- Learned the Flutter framework and Dart language within a matter of weeks in order to streamline the design process.
- Utilized Material and Cupertino design guidelines to begin implementing a minimal interface for both Android and iOS devices.

**iHaha**, Mobile App Development Final Project

January 2019 - July 2019

- Drafted design document for an Android mobile app according to set requirements, then researched Google Firebase and implemented a fully functional social media service.
- Designed a clean and satisfying interface and implemented it in XML.

**Personal Website**, Personal Project

January 2021 - Present

- Designed a personal website based on my resume and other personal details.
- Implemented using HTML, CSS, Bootstrap 5, and font libraries such as FontAwesome.

**ecophilium**, Web Development Project

September 2019 - December 2019

- Worked with three other students to create an interactive website using HTML, CSS, and JS in order to display different parts of the world and the problems they face.

**COVID Checklist**, DuckHacks for Social Good

August 2020

- Collaborated with a friend to design and build an efficient, all in one COVID-19 awareness Android application.
- Utilized Google Firebase to implement a chat room where people can talk together during the ongoing global pandemic.

## CLUBS:

**Stevens Institute of Technology**, Hoboken, NJ

Stevens Computer Science Club

January 2021 - Present

**Abington Heights High School**, Clarks Summit, PA

Computer Club

September 2017 - June 2019

- Salvaged parts from broken or old computers and built into working computers, then donated to families in need.
